

Dylan Almond

I'm a 19-year-old developer based in **Southampton, UK**, specializing in front-end development with experience across full-stack and AI projects. I've worked with clients to build modern websites, applications, and digital products. I love turning ideas into visually striking, user-friendly digital experiences.

Work Experience

Freelance Development

2024 - Ongoing

I've delivered tailored solutions for clients, including full-stack development, AI integration, backend systems, and UI/UX design. I apply best practices in performance optimization, testing, CI/CD, and SEO to create scalable, high-performing, and visually refined digital products.

Psion Vision

2022 - 2025

Worked with a small, cross-functional team across XR, AI, and enterprise software platforms, with a strong focus on engineering leadership, DevOps, and product design.

- Led end-to-end development of a cross-platform XR software suite, spanning architecture, cross-platform app engineering, and deployment, integrating AR-driven features with a modern, scalable UI/UX design system (dylanalmond.net/work/psion-workflow).
- Introduced company-wide Git/GitHub standards and CI/CD pipelines.
- Built a modern design system and UI framework for desktop and web apps (dylanalmond.net/work/psion-design-system).
- Redesigned internal project management tool to improve UX and performance.
- Led R&D for AI-driven ANPR systems and Android voice control solutions.
- Delivered major performance optimizations (up to 60% faster load times).
- Implemented accessibility features including multilingual TTS/STT.
- Established Android release processes and APK signing for production builds.

Tech: React, TypeScript, CSS, Tailwind, jQuery, Node.js, Three.js, Express.js, Electron, Cordova, Tauri, React Native, Capacitor, Expo, Java, Kotlin, Rust, Docker

Personal Projects

Personal Portfolio Website

2025

Live Site: dylanalmond.net

GitHub: github.com/DylanAlmond/website-v4

Developed a fast, accessible, and SEO-friendly static portfolio site using Astro, TypeScript, Tailwind CSS, Alpine.js, and Web Components. Content is authored in Markdown/MDX and served as static pages with optional client-side enhancements. Features include responsive design, accessible navigation, PWA offline support, automated RSS/sitemap generation, and modular reusable components. Emphasised performance, maintainability, and modern front-end architecture.

Tech: Astro, Alpine.js, TypeScript, Tailwind, Web Components, PWA, SEO, Figma

Personal Projects – Continued

“Recipe Tinder”

2025

Case Study: dylanalmond.net/work/recipe-app

An experimental platform that reimagines recipe discovery through AI-driven personalization and vector-based matching. Inspired by the swipe mechanics of dating apps, it learns user preferences through direct feedback to refine recipe recommendations over time. The project currently includes a fully functional TypeScript + Express backend with PostgreSQL (pgvector) for embedding search and LangChain for natural-language recipe queries. A React Native + Expo frontend is planned to deliver an interactive mobile experience, while the current focus remains on perfecting the backend architecture and intelligent recommendation logic.

Tech: LLMs, LangChain, PostgreSQL, PGVector, Node.js, Express.js, TypeScript, Python, Figma, Docker, React Native, Expo

Sudoku

2025

Live Game: sudoku.dylanalmond.net

GitHub: github.com/DylanAlmond/sudoku

Built an interactive Sudoku game using React, TypeScript, and CSS, focusing on both gameplay logic and clean UI design. Features include dynamically generated solvable puzzles, a drag-and-drop number input system, scoring and life mechanics, optional hints, and a post-game solution reveal. Implemented light/dark mode and responsive layout to optimise usability across devices.

Tech: React, TypeScript, CSS

Dynascale

2025

NPM: npmjs.com/package/dynascale

GitHub: github.com/DylanAlmond/dynascale

Developed a reusable React component using TypeScript and CSS that dynamically scales its child elements to fit within a container while preserving aspect ratio. Ideal for responsive layouts, the component automatically adjusts content size on container resize events and supports nested children structures. Built with a focus on modular architecture, clean API design, and performance optimisation.

Tech: React, TypeScript

Personal Projects – Continued 2

Music Player

2025

GitHub: github.com/DylanAlmond/music-player

Created a desktop music-player application using Rust (backend) and TypeScript/HTML/CSS (frontend). The backend leverages the Tauri framework for a lightweight cross-platform shell, with libraries such as Rodio (audio playback), Lofty (metadata parsing) and Souvlaki (system media control) to deliver a full-feature player. The UI uses a nostalgic “Windows 98” aesthetic via 98.css and supports MP3/FLAC playback, queue management, playback controls, volume slider, looping and OS media-control integration.

Tech: HTML, CSS, TypeScript, Tauri, Rust

Archive.org Downloader

2025

GitHub: github.com/DylanAlmond/archive-org-downloader

Created a command-line Python utility to download complete archives from Internet Archive (archive.org) items using a given identifier. Features include automatic retry for failed downloads, integrity validation via MD5/SHA1 hashes, optional skipping of derivative files, and multithreaded parallel download support. Built for efficiency and reliability in large-scale data retrieval, and released under the MIT licence for open-source reuse.

Tech: Python

Skills

Product & Cross-Platform Software Engineering

Rust, Python, Java, Kotlin, Tauri, Electron, React Native/Expo, Capacitor/Cordova

Full-Stack Web Development

HTML, CSS, SCSS, Tailwind, JavaScript, TypeScript, Three.js, React, Next.js, Vue, Alpine.js, Astro, PHP, WordPress, SEO

Backend & API Engineering

Node.js, Express.js, GraphQL, Prisma

AI & Intelligent Systems

LangChain, PGVector, Model Context Protocol

Infrastructure, DevOps & Platforms

Git, Docker, Windows, Linux, Android

Databases

MySQL, PostgreSQL, SQLite, MongoDB

Design

Figma, Adobe Suite
